"The marriage of architecture and interior design is like any relationship. If they don't work together, they can't accomplish anything. But when they do, they can create a masterpiece."

AJW Designs, Inc. blends the award-winning styles of husband and wife team Ann and John Wisniewski, architect, to give the unique concierge touch their clients are looking for. Influenced by classic designs, world travels and a passion for living well blended with modern innovations, their approach is to use creative problem-solving while being driven by the uniqueness of each project to create their designs. Their knowledge and experience bring higher investment value and functional use of space to every project they undertake.

This journey has given Ann the opportunity to represent her colleagues as President of the Georgia Chapter of the American Society of Interior Designers and to give back through community projects, such as Dwell with Dignity. She has been featured in *Modern Luxury Interiors*, *Atlanta Homes and Lifestyles*, *House Beautiful* and recently in *Traditional Home*.
